CLARE L. BERRYHILL, DIRECTOR
CALIFORNIA DEPARTMENT OF FOOD AND AGRICULTURE

AND

THE HONORABLE BOARD OF SUPERVISORS
COUNTY OF TULARE

Clyde R. Gould, Chairman
Lori Magine LeRoy Swiney
John R. Conway Ben Webb

John Mc Clure
County Executive Officer

Gentlemen:

In accordance with the provisions of Section 2279 of the California Agricultural Code. I am pleased to submit the Annual Agricultural Crop Report of the acreage, production and valuation of the agricultural commodities produced in Tulare County during the calendar year 1985.

This report is the result of information gathered from many sources, and as always, it must be emphasized that the figures are gross returns to the producer and do not indicate actual net profit.

I wish to express my sincere appreciation to all the producers, processors and agencies, both private and governmental, who assisted in compiling this report. I would also like to thank all the members of my staff, without whose input, the publication of this report would be impossible.

Respectfully submitted,

Clyde R. Churchill
Agricultural Commissioner/Sealer

DIVERSITY

Our 1985 Crop and Livestock Report cover graphically illustrates several of Tulare County's leading crops and commodities. The widely-diverse nature of these orchard crops, field crops and livestock products has consistently provided Tulare County with a stable economic base -- even during today's period of dynamic change in the agricultural marketplace.

This diversity of crops is due in part to the nature of our climate and soil conditions. Tulare County includes Mount Whitney, the highest point in the lower 48 states, as well as the valley floor. Soil types range from rich sandy loam to the fine clays of the Tulare Lake Basin. Our weather provides for an almost year-round growing season, yet can range from below freezing in the winter to well above 100 in the summer.

The current top ten crops -- Oranges, Dairy Products, Grapes, Cotton, Plums, Cattle, Alfalfa Hay, Nectarines, Silage and Walnuts -- themselves represent over one billion dollars in direct income to Tulare County. They provide the foundation for a wide variety of related services not only in the agribusiness community, but in the county as a whole. Its difficult to imagine any type of business here in Tulare County that does not owe at least a portion of its success to our well established agricultural base.

Looking at the leading crops, one can't help but notice that they span the spectrum from foothill cattle grazing to orchard and vine crops to field crops on the valley floor. Unlike many places that must rely heavily on a single type of crop and whose fortunes rise and fall as the crop rises and falls, we here in Tulare County enjoy a broad agricultural base that enables us to succeed in a wide variety of conditions and economic situations.

Additional benefits of the diverse nature of our leading commodities include the following:

- * A buffer is provided in the event of climatic disaster. With the varied types of commodities, different growing areas and different periods of vulnerability, it is unlikely that severe weather would adversely affect all of the crops simultaneously.

- * Another very important buffer is provided against insect or disease injury. Again, for reasons similar to the above, it is unlikely that a new insect pest or disease would affect all of the crops.

- * Yet another benefit lies in the potential for year-round farm related jobs. The various crops (and the varieties within crops) now provide work well beyond the traditional "harvest season".

These factors, varied elevations, soil types and climatic conditions when combined with others such as: available labor, extensive packing and shipping facilities, well-developed markets and the related businesses available, make Tulare County the productive agricultural county that it is today.
